

PROJECT PROFILE

Project Title: COMPLETION OF CSUCC ACADEMIC BUILDING COMPLEX PHASE III

Project Description/Objectives:

The proposed Academic Building for the Cabadbaran campus is designed to support the dynamic and evolving educational needs of its community. The Academic building Right and left wing will consist of 12 classrooms in the right wing (three of which will serve as engineering laboratories), and 9 classrooms in the left wing. The right wing, including its engineering laboratories, is part of the 2026 proposal, as is the left wing, ensuring phased development to meet future academic demands.

Each floor will feature separate male and female comfort rooms, and all classrooms will have a standard area of approximately 76 square meters, offering ample space for a variety of academic programs. The facility will emphasize comfort, safety, security, accessibility, proper illumination, and ventilation to ensure an optimal learning environment.

The building’s design includes a courtyard that enhances the visual environment and encourages natural air circulation, creating a mild climate, especially during sunny days. The courtyard integrates greenery, leveraging natural transpiration from vegetation to maintain a comfortable atmosphere.

The building will primarily use structural steel, chosen for its tensile strength, durability, and high strength-to-weight ratio. Steel’s flexibility and mass production capability make it ideal for this modern educational facility.

The project is designed with environmental sustainability in mind, incorporating green technologies and disaster-resilient infrastructure. It will also adhere to gender and development compliance, follow government standards and the National Building Code, and provide a safe and inclusive space for all students, faculty, and staff.

Implementing Agency: Caraga State University – Cabadbaran City	Co-Implementing Agency:	Attached Agency:
Spatial Coverage: Caraga Region XIII	Municipality Cabadbaran City	Province Agusan del Norte

Development Priority Addressed:

- RDP 2023 -2028 Chapter/s:
 - Chapter 2: Regional Spatial Development Framework
 - Chapter 4: Promote Human and Social Development
 - Chapter 8: Revitalize Industry: Science, Technology, and Innovation-Driven Industrialization
 - Chapter 10: Advance Research and Development, Technology, and Innovation
 - Chapter 14: Ensure Peace and Security, and Enhance Administration of Justice
 - Chapter 15: Practice Good Governance and Improve Bureaucratic and Regulatory Efficiency
 - Chapter 16: Accelerate Climate Action and Strengthen Disaster Resilience

-
- 0+10 Point Agenda:
 - 2. Reduce vulnerability and mitigate scarring from the Covid-19 pandemic
 - 3. Ensure sound macroeconomic fundamentals
 - 4. Create more jobs
 - 5. Create quality jobs
 - 6. Create green jobs
 - 7. Uphold public order and safety, peace and security
 - Peace Agenda:
 - Caraganons are safer from any forms of crime
 - Insurgency related violence is reduced
 - Self-determination of Indigenous Peoples/ Indigenous Cultural
-

Results Matrix Indicators Addressed:

- Sub-chapter Outcome 1.2.2
 - Sub-chapter Outcome 1.3
 - Sub-chapter Outcome 1.3.1
-

University Strategic Objectives/ Thrusts and Priorities Addressed:

The strategic objectives for the Academic Building construction proposal revolve around enhancing academic excellence, supporting enrollment growth, fostering interdisciplinary collaboration, promoting sustainability and environmental responsibility, and engaging with the local community.

The thrusts prioritize academic infrastructure development, research facility enhancement, student life improvement, innovation and technology integration, and inclusivity. These priorities address safety and security, energy efficiency and sustainability, adherence to timeline and budget, regulatory compliance, stakeholder engagement, long-term viability, maintaining architectural identity, and establishing a comprehensive evaluation framework. These elements collectively form a comprehensive plan to align the building project with the institution's strategic goals and priorities.

Output Indicators:

Classroom Availability

- **Indicator:** Number of classrooms constructed and fully functional (including 20 in the central block, 12 in the right wing, and 9 in the left wing).
- **Target:** 41 classrooms and 3 engineering laboratories completed and operational by the end of the project.

Comfort Rooms (CR) Facilities

- **Indicator:** Number of male and female comfort rooms installed per floor.
- **Target:** Separate male and female CRs on each floor, with facilities in full compliance with accessibility standards.

Environmental Sustainability

- **Indicator:** Number of green technologies implemented (e.g., energy-efficient lighting, natural ventilation).
-

-
- **Target:** Full incorporation of environmentally sustainable technologies as per the project design.

Gender and Development Compliance

- **Indicator:** Percentage of the building's facilities that comply with gender and development standards.
- **Target:** 100% of facilities, including CRs and classrooms, compliant with gender and development guidelines.

Ventilation and Lighting Standards

- **Indicator:** Measured quality of natural ventilation and lighting within classrooms.
- **Target:** All classrooms meeting the prescribed standards for ventilation and illumination to ensure a conducive learning environment.

Accessibility Compliance

- **Indicator:** Percentage of building areas accessible to people with disabilities (PWD).
- **Target:** 100% of building facilities accessible to PWDs, ensuring compliance with government accessibility standards.

Outcome Indicators:

Improved Learning Environment

- **Indicator:** Percentage increase in student satisfaction regarding classroom comfort, accessibility, and functionality.
- **Target:** At least 85% of students report improved learning conditions due to better classroom facilities and environmental conditions.

Increased Enrollment Capacity

- **Indicator:** Increase in student enrollment numbers, particularly in programs housed in the new building (e.g., engineering, technical programs).
- **Target:** 20% increase in enrollment capacity for the campus within two years of the building's completion.

Improved Gender Inclusivity

- **Indicator:** Percentage increase in gender inclusivity as reflected in campus facilities usage surveys.
- **Target:** 100% gender inclusivity, with equal access to all facilities and compliance with gender and development (GAD) standards.

Enhanced Flexibility of Academic Programs

- **Indicator:** Number of new academic programs and courses introduced due to the availability of additional classrooms and laboratories.
- **Target:** Introduction of at least 5 new programs or specialized courses within three years of the building's completion.

Improved Gender Inclusivity

- **Indicator:** Percentage increase in gender inclusivity as reflected in campus facilities usage surveys.
-

- **Target:** 100% gender inclusivity, with equal access to all facilities and compliance with gender and development (GAD) standards.

Reduced Energy Consumption

- **Indicator:** Decrease in energy consumption per square meter due to the implementation of green technologies (e.g., natural ventilation, energy-efficient lighting).
- **Target:** 15-20% reduction in energy consumption within the first year of operation compared to older campus buildings.

Strengthened Disaster Resilience

- **Indicator:** Percentage of building components certified as disaster-resilient (e.g., earthquake, typhoon resistance).
- **Target:** 100% of building certified as disaster-resilient, with no structural damage recorded during routine inspections or natural disasters.

Increased Usage of Shared Facilities

- **Indicator:** Percentage of academic programs using the shared classrooms and laboratories for interdisciplinary activities.
- **Target:** 80% of academic programs utilizing the building for interdisciplinary activities within the first academic year after completion.

Implementation Period: 2026	Funding Source: GAA
------------------------------------	----------------------------

Investment Targets (In Exact Amount in PhP):

Year	Cost-Sharing					
	NG-Local	NG-Loan	NG-Grant	LGU	Private Sector	Others
2022 & Prior	80M					
2025	40M					
2026						
2027	120M					
Overall Total	240M					
Continuing Year						
Overall Total	240M					

Total Investment Targets (In Exact Amount in PhP): 240,000,000.00

Total Project Cost (In Exact Amount in PhP): 240,000,000.00

Status Category: <i>(Pls. check as applied)</i>	• Proposed with FS completed	• Proposed with on-going FS preparation	• Proposed with project Concept Paper
---	--	---	---

Status Updates:

The center part of the academic building is now 100% complete, housing a total of twenty classrooms.

Status Remarks:

Proponent:
Caraga State University Cabadbaran City

GAA Program Owner:
Caraga State University

NOTE: Sources of Funds - Locally-Funded (NG-Local, LGU and Private Sector); Foreign-Funded (Loan, Grant and Private Sector)

^{/1} This form will be accomplished for each of the programs/sub-programs of the agency

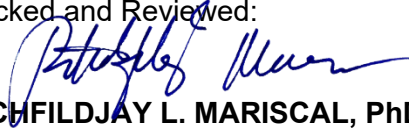

^{/2} Provide definition of the outcome and output indicators used for each program/sub-program under PREXC as well as the source or process of collection of data, unit of measurement and the means of verification. Indicate if the Pls currently used and where they are used: RM of NEDA, PIB, or PBB
